

# Team Contributions: POC Software Engineering

Team #22, TeleHealth Insights  
Mitchell Weingust  
Parisha Nizam  
Promish Kandel  
Jasmine Sun-Hu

This document summarizes the contributions of each team member up to the POC Demo. The time period of interest is the time between the beginning of the term and the POC demo.

## 1 Demo Plans

[What will you be demonstrating —SS]

## 2 Team Meeting Attendance

[For each team member how many team meetings have they attended over the time period of interest. This number should be determined from the meeting issues in the team's repo. The first entry in the table should be the total number of team meetings held by the team. —SS]

Student	Meetings
Total	Num
Name 1	Num
Name 2	Num
Name 3	Num
Name 4	Num
Name 5	Num

[If needed, an explanation for the counts can be provided here. —SS]

### 3 Supervisor/Stakeholder Meeting Attendance

Student	Meetings
Total	6
Mitchell Weingust	6
Jasmine Sun-Hu	6
Parisha Nizam	5
Promish Kandel	5

Promish and Parisha each missed one meeting when they were sick. All team members attended supervisor and stakeholder meetings when the circumstances allowed it. If a team member missed a meeting, they caught themselves up by reviewing meeting notes and talking with other teammates.

### 4 Lecture Attendance

[For each team member how many lectures have they attended over the time period of interest. This number should be determined from the lecture issues in the team's repo. The first entry in the table should be the total number of lectures since the beginning of the term. —SS]

Student	Lectures
Total	Num
Name 1	Num
Name 2	Num
Name 3	Num
Name 4	Num
Name 5	Num

[If needed, an explanation for the lecture attendance can be provided here. —SS]

## 5 TA Document Discussion Attendance

Student	Lectures
Total	3
Mitchell Weingust	3
Jasmine Sun-Hu	3
Parisha Nizam	3
Promish Kandel	3

## 6 Commits

[For each team member how many commits to the main branch have been made over the time period of interest. The total is the total number of commits for the entire team since the beginning of the term. The percentage is the percentage of the total commits made by each team member. —SS]

Student	Commits	Percent
Total	Num	100%
Name 1	Num	%
Name 2	Num	%
Name 3	Num	%
Name 4	Num	%
Name 5	Num	%

[If needed, an explanation for the counts can be provided here. For instance, if a team member has more commits to unmerged branches, these numbers can be provided here. If multiple people contribute to a commit, git allows for multi-author commits. —SS]

## 7 Issue Tracker

[For each team member how many issues have they authored (including open and closed issues (O+C)) and how many have they been assigned (only counting closed issues (C only)) over the time period of interest. —SS]

Student	Authored (O+C)	Assigned (C only)
Mitchell Weingust	143	40
Jasmine Sun-Hu	11	43
Parisha Nizam	3	44
Promish Kandel	4	37

For the authored issues, Mitchell was elected to create the issues for the team for organizational purposes. Assigned issues are distributed very evenly, disparities are due to cases where when dividing the workload one team member is assigned a few larger sections, and another is assigned multiple smaller sections.

## 8 CICD

[Say how CICD will be used in your project —SS]

[If your team has additional metrics of productivity, please feel free to add them to this report. —SS]
